

1200 CALORIE SIMPLE MEAL GUIDE

HIGH PROTEIN - MODERATE CARBS - MODERATE FATS

Eating well does not need to be complicated. The purpose of this book is to provide you with a clear and useful framework for creating meals that support your objectives while maintaining a daily calorie intake of approximately 1200.

Rather than strict diets or unrealistic meal planning, this program promotes everyday foods and simple meals that fit into a busy lifestyle.

INSIDE THIS GUIDE YOU WILL FIND

- A sample day of eating to show how a 1200 calorie day can look
- Simple breakfast, lunch and dinner ideas
- Snack options to help manage hunger
- A food swap guide to give you flexibility
- A basic shopping list to make planning easier

To keep you full, energised, and consistent, all meals are centred around foods high in protein, balanced carbs, and moderate fats. Consider this guidance as a tool to help you simplify your diet rather than something you have to adhere to exactly.

HOW TO USE THIS GUIDE

The purpose of this guide is to help you stay structured without feeling restricted.

To learn how meals can be scheduled throughout the day while adhering to your calorie goal, start by examining the sample day. Using the meal alternatives listed later in the tutorial, you can then start creating your own days.

Some people prefer to:

- Repeat the same breakfast most days
- Rotate 2–3 lunch options
- Keep dinners simple and consistent

This approach often makes nutrition much easier to manage long term.

The switch guide can assist you in substituting meals with comparable substitutes without having to recalculate everything if you ever wish to alter a meal.

REMEMBER

- You do not need perfect meals to make progress.
- Pay attention to prioritising protein, keeping your meals straightforward and consistent, and staying generally under your calorie target.
- Small consistent actions will always outperform complicated plans.

YOUR DAILY TARGETS

Daily Calories

1200 calories

Protein Target

100–120g protein per day

Carbohydrates

Moderate carbohydrates to support energy levels.

Fats

Moderate fats to support satiety and hormone health.

Water

Aim for 2–3 litres per day.

Daily Movement

7,000–10,000 steps per day.

Small habits done consistently will always outperform complicated plans.

FULL DAY

1200 CALORIES

MEAL		CALORIES	PROTEIN
Breakfast	Protein Oats Bowl • 40g oats • 30g whey protein • 150ml unsweetened almond milk • 50g frozen berries	300	30g
