NUTRITION MADE SIMPLE

EAT WELL WITHOUT COUNTING.

A simple method that works in real life. **No barcodes, no apps taking over your head.** Just a structure you can repeat every day.

Mark Davies
Founder, Zenith Fit

Structure beats motivation. Every single time.

THE PHILOSOPHY

THE ONLY GOAL

If counting every calorie takes over your headspace, **we're not doing it.** You can still lose fat, build muscle and feel in control with a simple structure you repeat every day, without scanning a single barcode.

Eat mostly whole foods, hit enough protein, and eat a little less than you burn. Do that on average over the weeks, and fat comes off. That's the whole thing.

YOU DON'T NEED AN APP. YOU NEED A SYSTEM YOU CAN REPEAT.

This is the Zenith way to keep nutrition practical, flexible and consistent, when life's busy and nothing goes to plan.

THE FOUNDATION

THE SMART PLATE

Build every main meal this way. **Your hand is the measuring tool.** It works at home, in restaurants and on holiday, and you can't forget it.

1 to 2 palms

PROTEIN

Chicken, turkey, lean beef, fish, prawns, eggs, Greek yoghurt, cottage cheese, tofu, lentils.

Why: keeps you full, protects your muscle and makes fat loss easier.

1 to 2 fists

VEG OR FRUIT

Salad, mixed veg, peppers, onions, broccoli, spinach, berries, apples.

Why: volume and fibre. Fuller for longer, better digestion.

1 cupped hand

CARBS

Rice, pasta, potatoes, oats, wraps, bread, cereal, beans.

Training day: 1 to 2 hands. **Rest day:** 0 to 1. Adjust to your energy.

1 thumb

FATS

Olive oil, butter, cheese, nuts, avocado, pesto, mayo.

Watch this one. Healthy, but calorie dense. It's where most people overdo it without realising.

YOUR DAY

YOUR DEFAULT DAY

The simplest way to win most weeks: **pick one structure and repeat it.**

OPTION A: 3 MEALS

1. **Breakfast.** Smart Plate.
2. **Lunch.** Smart Plate.
3. **Dinner.** Smart Plate.

OPTION B: 2 MEALS AND A SNACK

1. **Meal 1.** Smart Plate.
2. **Meal 2.** Smart Plate.
3. **Snack.** Protein focused.

PROTEIN SNACK IDEAS

- Greek yoghurt and berries
- Protein shake and a banana
- Cottage cheese and fruit
- Chicken pieces and salad
- 2 boiled eggs and an apple

PRE LOG IT

The night before, log tomorrow's food into the app. **Decide when you're calm, not when you're starving at 6pm.** It takes 5 minutes and it's the single best habit in this guide.

PROTEIN

PROTEIN WITHOUT TRACKING

Pick whichever suits you. **Not sure? Start with the meal method.** You'll land close to your number anyway.

Option 1

PROTEIN PER MEAL

Most people do brilliantly with this.

- **Women:** 1 palm, 3 meals a day
- **Men:** 2 palms, 3 meals a day

Option 2

A DAILY MINIMUM

If you like a number to aim for.

- **Women:** 100g a day
- **Men:** 130 to 160g a day

BALANCE

THE 80/20 RULE

80% solid meals, 20% flexible across the week. A treat is fine when it's planned and owned. **One treat is a treat. A treat, then a binge, then writing the day off is a spiral.**

- Have it
- Enjoy it
- Back to normal at the next meal
- No punishment workouts
- No starving yourself the next day
- Never miss twice

HUNGER AND SNACKS

THE GAPS BETWEEN MEALS

Most overeating happens in the gaps between meals. **That's where we pay attention.**

YOUR HUNGER CHECK

Before you eat, ask: am I hungry, or am I bored, stressed, tired or putting something off?

During the meal, aim to finish at 7 out of 10 full. Satisfied, not stuffed. If you regularly eat to 10 out of 10, fat loss is hard even on healthy food.

SNACK RULES

Make it protein plus fibre.

- Greek yoghurt and berries
- Apple and cottage cheese
- Protein shake and fruit
- Chicken and salad

TREAT SNACKS

Have it. Properly.

- Portion it out
- Sit down
- No phone
- Never standing in the kitchen

DRINKS AND EATING OUT

THE CALORIES YOU DON'T NOTICE

DRINKS

Aim for 2 to 2.5 litres of water a day. Watch alcohol, sugary coffees, juices and smoothies, fancy hot chocolates and full sugar fizzy drinks.

- Diet drinks over full sugar
- Americano, or a latte with less milk
- Zero sugar syrups
- Sparkling water with lime

EATING OUT

You can still enjoy a meal out and make progress. You just need a plan.

1. Pick a protein meal: chicken, steak, fish, a lean burger, kebab or fajitas.
2. Add veg or salad. Ask for extra.
3. Sauces on the side, and a starter or a dessert, not both.

Eating out this week? Use the Eating Out Guide in HQ before you go. Tell it where you're going and it'll tell you exactly what to order.

ACCOUNTABILITY

THE WEEKLY CONSISTENCY SCORE

Progress is about your averages. **Score every day out of 3.**

1

PROTEIN

Built your main meals around protein. Intentional, not perfect.

1

VEG OR FRUIT

1 to 2 fists with your meals across the day.

1

SNACKS AND DRINKS

Snacks planned, drinks mostly low calorie, no grazing.

3 points: you were bang on plan. **1 to 2:** partly there. **0:** the day drifted. Aim for **15 to 18 points a week.** Hit that and you'll make progress.

WHEN PROGRESS STALLS

Scale not moving for 2 to 3 weeks? **Change one thing:**

- One cupped hand of carbs less a day, or
- One thumb of fats less a day, or
- One snack less a day

Pick one lever and give it 10 to 14 days. Don't change everything at once.

YOUR NON NEGOTIABLES

NAIL THE PLATE. REPEAT.

SMART PLATE EVERY MAIN MEAL

Your foundation, every time.

PROTEIN AT EVERY MAIN MEAL

Non negotiable for results.

2 LITRES OF WATER MINIMUM

It helps everything else.

PLAN YOUR TREAT

Enjoy it, then move on.

NAIL THE PLATE. NAIL THE PROTEIN. CONTROL THE SNACKS. REPEAT.

You don’t need to count calories to get results. You need a structure you can stick to when life is busy, stressful and unpredictable. **If you’re struggling, message me early and we’ll fix it fast.**
